## MAGMASTER

Yelo's MagMaster 65 makes spreading magnesium powder simple and reliable, helping support pasture growth and manage grass staggers linked to magnesium deficiency in livestock.

Magnesium powder can clump due to moisture and its fine particle size, but the MagMaster is built to keep material flowing smoothly and apply it evenly where it counts.

Lightweight and easy to tow behind an ATV, RTV, or ute, the hopper comfortably holds two 25kg bags of mag powder, so you spend less time refilling and more time getting the job done.

### FEATURES

- Uniquely designed for magnesium powder
- Aggressive agitation prevents 'bridging'
- Wide shroud to control dust
- Stainless spinner with 3m spread width (at 10kph)
- Manual easy pull open/shut hopper lever
- Removable pin on drive axle
- Wide wheel track provides stability on uneven terrain

### SPECS

- 65 litre poly hopper with snap shut lid
- 1340mm wheel track width
- 57kg weight empty

MAGMASTER / Part No 3002

### NO FUSS, ALL FUNCTION
